

ALLDOLLY & You Can Do it!

(Remove and replace any oven without help)

With this simple procedure...

(1) Free the oven and pull out about 2-3 inches—enough to clear the AllDolly's sliding beam.

(2) Roll the AllDolly into position. The leg panels should be rotated away from the oven. Lift support beam into position under the front of the oven.

(3) Adjust the support so the oven is resting on the beam and not the cabinet. Use the AllDolly to pull oven 3/4 of the way out (about 16")

(4) Swing/rotate one leg along side the oven and slide short beam up until it supports the oven. Repeat with the other side.

(5) The oven should now be supported by your AllDolly: off you go!

The AllDolly is the first material handling dolly designed specifically for installing, repairing and moving ovens, though the AllDolly can be used when servicing many other appliances as well.

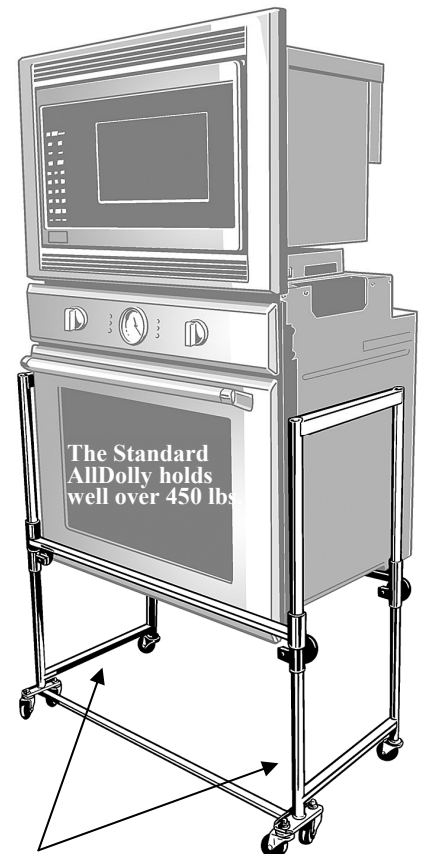

Over the years the AllDolly has been used to move lots of things around the home as well as on the job.

All of our products are handmade here in America. We make them to do the job you need and we make them to last.

- Rotation of the legs does the job.
- Six non-marking casters each rated to 75 pounds, two with locks.
- Total capacity of well over 450 pounds.
- Working width 31," height adjusts from 7" to 36".
- Proudly made in America, all steel, zinc plated.
- Folds to 34" wide by 38" tall to only 4" deep!
- Weighs only 25 pounds.

"I just wanted to tell how incredible your AllDolly is. I suppose that I'm not telling you anything you don't already know but WOW! Your product is awesome. My techs are fighting over who's going to carry the unit in their truck. So I would like to order four more."

— Dean, Landers Appliance, MD

Our patented rotating legs provide flexibility of shape and movement to let you work in tight places
